

Step 6: Project Details for Traceability Equipment (Animal Health) (AHEQ-PD-B)

1. Which commodities will be impacted by this project? (Check all that apply)

Bison

Cattle

Sheep

Goats

Swine

Farmed cervid

Poultry

Other, specify: _____

2. What kind of traceability system is currently in place? (Select one)

Paper-based

Combination of paper and electronic

Fully electronic/automated

No formal traceability system

3. How will your project enhance the incident and emergency management capabilities of your operation? (Check all that apply)

Reduce emergency response times, explain:

Enhance response readiness, explain:

Enhance data availability, explain:

Easier access to information, explain:

None of the above

Full Name: _____

FBRN: _____

4. Is the project focused primarily on preparing for upcoming traceability requirements (e.g. regulations)?

Yes, specify what requirement(s): _____

No

5. What are the objectives of the project related to market opportunities and competitiveness? (Check all that apply):

Implementation is essential for retaining share in the current market and meeting market requirements, explain:

Implementation will enable access to new markets, explain:

Implementation will help achieve a competitive advantage, explain:

None of the above.

6. This project will facilitate (check all that apply):

Animal identification

Premises identification

Movement recording within the farm

Movement recording off the farm

Movement reporting

None of the above

Full Name: _____ **FBRN:** _____

7. What operational efficiencies will result from this project? (Check all that apply)

Better control of animal inventory, explain:

Reduced time spent recording information, explain:

Identify and track sources and costs of waste, explain:

Track use of labour, inputs (e.g., animal health products) and/or equipment, explain:

Monitor costs for the movement of transport animals, products, and other materials, explain:

Reduced errors, explain:

Other, specify and explain:
