

Step 6: Project Details for Traceability System Improvements (Animal Health) (AHEQ-PD-C)

1. Which commodities will be impacted by this project? (Check all that apply)

Bison

Cattle

Sheep

Goats

Swine

Farmed cervid

Poultry

Other, specify: _____

2. What kind of traceability system is currently in place? (Select one)

Paper-based

Combination of paper and electronic

Fully electronic/automated

No formal traceability system

3. How will your project enhance the incident and emergency management capabilities of your operation? (Check all that apply)

Reduce emergency response times, explain:

Enhance response readiness, explain:

Enhance data availability, explain:

Easier access to information, explain:

None of the above

4. Is the project focused primarily on preparing for upcoming traceability requirements (e.g., regulations)?

Yes, specify what requirement(s): _____

No

5. You must complete and attach a Food Safety and Traceability Action Plan template to apply to this project category. In your completed plan, have you identified qualified individual(s) (e.g., current staff or third-party consultants) and the necessary skills that will be required to complete the project?

Yes

No

6. For each piece of equipment or upgrade identified in your completed Food Safety and Traceability Action Plan, have you included the creation or update of written procedures to address food safety risks?

Yes

No

7. What are the objectives of the project related to market opportunities and competitiveness? (Check all that apply):

Implementation is essential for retaining share in the current market and meeting market requirements, explain:

Implementation will enable access to new markets, explain:

Implementation will help achieve a competitive advantage, explain:

None of the above.

8. This project will facilitate (check all that apply):

Animal identification

Premises identification

Movement recording within the farm

Movement recording off the farm

Movement reporting

None of the above

Full Name: _____

FBRN: _____

9. What operational efficiencies will result from this project? (Check all that apply)

Better control of animal inventory (e.g. herd management), explain:

Reduced time spent recording information, explain:

Identify and track sources and costs of waste, explain:

Track use of labour, inputs (e.g., animal health products) and/or equipment, explain:

Monitor costs for the movement of transport animals, products, and other materials, explain:

Reduced errors, explain:

Other, specify: _____

None of the above

10. Have you completed training or education specific to food safety or traceability implementation to support your project?

Yes (attach certificate(s) of completion)

No

11. Do you plan to communicate your project results to benefit your sector or industry?

Yes (please attach your communications plan to your application)

No

Full Name: _____

FBRN: _____
